# Discovering Research Data Resources at IU

IU Research Data Commons

Ann McCranie, Emily Meanwell & Logan Schuerman October 14, 2024

# The Research Data Commons

# The IU Research Data Commons

Your front door to research data resources at IU

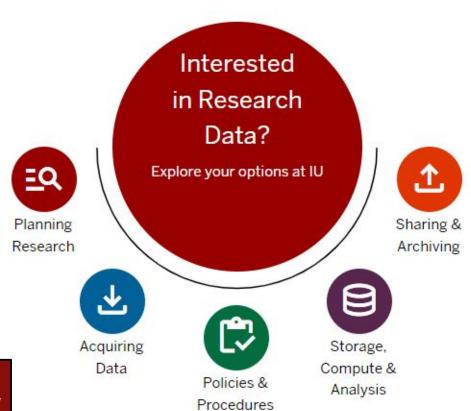

- New initiative of the Vice
   President of Research, in collaboration with the IU Libraries, UITS, and others
- Recently launched a new website at <u>researchdata.iu.edu</u> with FAQs, resource catalog, featured data resources, event listings, and more.
- A growing collection and you can help

#### Frequently Asked Questions

#### **RDC FAQs**

- Over 40 answers to commonly asked research data questions
- Each question guides you to additional information on the topic and the relevant university office or person
- Have a question that you would like to see answered? <u>Please let us know!</u>

Yes! You will get a copy of all of these slides as soon as the meeting is over and we will post this recording to our website within a few days.

#### Resource Catalog

#### **Resource Catalog**

- Features over 160 resources across IU campuses as well as publicly available resources
- Covers areas such as resource guides, policies & compliance, storage & compute, software, and more
- We are continuing to build this catalog.
   If you are aware of a resource that isn't listed, please let us know! Email: iurdc@iu.edu

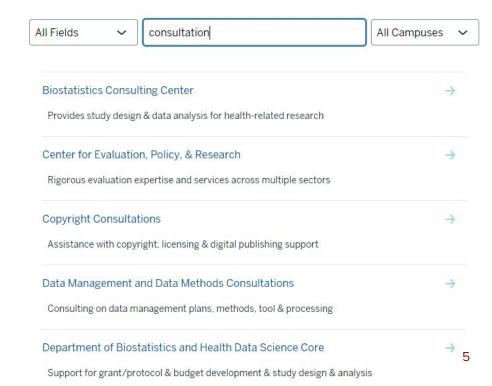

#### Resource Catalog

Explore all the resources available to you for working with your data @ IU

#### Featured Data Program

Locally created resources for the IU community to learn about data available for reuse.

Currently, five published self-paced Canvas tutorials.

- A Guide to Using CoreLogic at IU
- A Guide to Using INPC (Indiana Network for Patient Care) and Electronic Health Records (EHR) For Research at IU
- A Guide to Using HCUP (Healthcare Cost
   & Utilization Project) Data at IU
- A Guide to Using Climate Data for Research
- A Guide to Using AllofUS at IU

More in development!

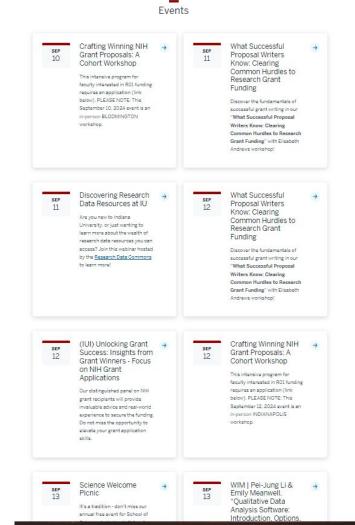

#### Events around IU campuses

IU RDC maintains <u>an events</u>
<u>listing</u> for all shareable events
related to research data - across
units and campuses.

You can also browse:

https://events.iu.edu/iurdc/all

#### Open Access Week Events

The annual international Open Access Week (OA) is an opportunity for the academic and research community to discuss the benefits and challenges of OA. Libraries across the IU campuses are hosting various events and programs for OA Week.

- October 21st 25th: <u>Take the OA Week Challenge</u>
- October 22nd: Open Access Week Lunch and Lecture
- October 23rd: <u>Faculty Conversation about Open Access</u>
- October 25th: <u>Live Q&A for Open Access Week Challenge</u>

#### Monthly RDC newsletter

- New **events** around IU's campuses
- New featured data resources available for reuse
- Funding opportunities internal and external
- New resources at IU related to research data from UITS, libraries, and the RDC
- Policy and procedure updates
- Opportunities to get involved in the RDC through workgroups, committees, etc.
- Sign up on our <u>Contact page</u>

#### In this issue:

- Letter from the director
- New Data FAQ Portal and Resource Database
- · Self-paced learning courses on resources at IU
- IU joins HELIOS Open
- · Register for webinar series on data resources
- · Events around IU campuses

#### Letter from the director

Welcome back! As we transition to the academic year, many in our community may have questions about research data resources at IU? We have answers! I encourage you to explore our updated website at <a href="mailto:researchdata.iu.edu">researchdata.iu.edu</a>, where you'll find valuable information FAQs, a resource catalog, and event listings.

# Questions?

And a quick poll...

### Library Resources

#### **IU** Libraries

IU Libraries are specific to campuses, but have some cross cutting resources.

Subject librarians are major resources!

Three major resources for those in Bloomington and Indianapolis are research data librarians:

- Heather Coates, IUI University
   Library Digital Scholarship and
   Data Management Librarian,
   also Research Data Steward for
   all of IU)
- <u>Levi Dolan</u>, Ruth Lilly Medical
   Data Services Librarian
- <u>Ethan Fridmanksi</u>, IUB Data
   Services Librarian

#### The role of the IU Research Data Steward

#### Heather Coates, IUI University Library

- 1. Collaborates with the Research Integrity Office, HIPAA Privacy Officer, Human Subjects Office, and other administrative units to develop comprehensive guidance for research data management at IU.
- 2. Supports researchers in complying with funder and publisher data policies,
- 3. Manages the IU Indianapolis DataWorks data repository
- 4. Provides training to faculty, staff, and students on good data practices
- 5. Works with the IU RDC in leadership capacity

If you have a question about data classification and policy, <u>you should</u> <u>contact her</u>.

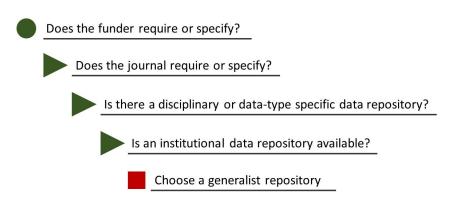

#### TOOLS YOU CAN USE

The <u>Data Storage &</u>
<u>Handling Tool</u> (DSH) helps researchers understand how their data is classified (more on this later) and what kind of storage and handling services they may use.

#### Platforms for Sharing & Archiving Data

#### Which data repository?

You have options at IU, but there are <u>many considerations for</u> <u>how to share your data</u>.

Sharing & Archiving

#### Major Library data resources

#### **GUIDES**

- Managing and Sharing Research
   Data
- Ruth Lilly Medica <u>Library Research</u>
   Data Services
- <u>IUI Library Guide</u> <u>Finding Statistics</u> and Data
- New Electronic Resources List
- Open Scholarship at IUB Libraries

#### **CONSULTATION SERVICES**

- Ask a Librarian
- Data Management Plan Consultations from IUB, IUI, and Ruth Lilly

#### **TRAINING & EVENTS**

- Scholars Commons Workshops
- Ruth Lilly options in
  Lab Notebooks, NIH Data
  Management & Sharing,
  Systematic Reviews,
  Citation Management

#### **SERVICES & TOOLS**

- <u>Data Management</u> <u>Plan Tool</u>
- IUB ScholarWorks
- IUI Scholarworks
- <u>IUI DataWorks</u>

In development: Data
Catalog, DataCore

# Information Technology Resources

### UITS Research Technologies

Offers access, training, and support for <u>a wide variety of</u> research needs

176 departments and over 331 disciplines use IU's advanced research cyberinfrastructure provided and supported by RT.

Over 1,800 IU researchers who use IU supercomputers or other HPC tools received nearly \$430 million in grant awards in FY22.

#### Major Information Technology data resources

#### **GUIDES**

- Tech Guides
  - o <u>Faculty</u>
  - o <u>Students</u>
  - o Staff
  - o <u>Collaborators</u>
- ServiceNow Knowledge (formerly Knowledge Base)

#### **CONSULTATION SERVICES**

Research Technologies

#### **Services & Tools**

- <u>High-Performance</u> <u>Computing</u>
- <u>IUware</u>
   (downloadable
   software)

#### **Training & Events**

- Quantum Computing (October 17)
- New Features in IU
   REDCap (October 23)
- Intro to Deep Learning (October 24)
- <u>Data Management and</u>
   <u>Administration</u>
   (November 6)
- Advanced Topics in Deep Learning (November 14)

# UITS Research Technologies

See <u>impact stories/use cases</u> to learn how UITS RT enables research and discovery at IU and beyond.

### IU has substantial resources to help researcher, for example:

- Software for research
- Fast computers optimized for Al
- Fast storage
- Archival resources
- Visualization resources and workflows
- Cloud computer
- Expert humans

#### Resources

- Compute Resources
  - o Big Red 200
  - Quartz
  - Jetstream2
  - Research Desktop (RED)
- Storage Resources
  - Geode home directory
  - Geode-Project
  - Scholarly Data Archive
  - Slate
  - Slate-Project
  - Slate-Scratch

- Visualization
  - Advanced Visualization Lab
  - o IU3D
- Expert Consulting
- IU REDCap

#### **Research Data Services**

- GIS Data and GIS Software
- Restricted Access Data Remote Server (RADaRS)
- Research Database Complex (RDC)
- Scholarly Data Share (SDS)

#### Pervasive Technology Institute

- Center for Applied Cybersecurity Research
- Data to Insight Center (D2I)
- Cyberinfrastrucure Integration Research Center
- UITS Research Technologies
- HathiTrust Research Center
- Crisis Technologies Innovation Lab
- eLearning Research and Practice Lab

### **IU** Research

#### **IU Research**

Supports research and creative activity throughout the university

- Office for Research
   Administration
- Office for Research Compliance
- Office for Research
   Development
- Corporate & Foundation
   Relations
- Innovation & Commercialization
- National Security R&D Relations
- Centers, Institutes, & Museums

#### Major IU Research resources

#### **GUIDES**

- Research compliance and policies
- Quick Guides

#### **CONSULTATION SERVICES**

<u>Proposal</u><u>Development</u><u>Services</u>

#### **TRAINING & EVENTS**

- Grantwriting workshops; see events calendar
- Event recording archive

#### **SERVICES & TOOLS**

- <u>Internal seed</u> funding programs
- Pivot (external funding database)

### Policies and rules

In general, research data is considered institutional data when IU has legal and/or ethical obligations with regards to the associated award, project, or the data itself.

If external (public domain, open, or licensed) data are reused in the conduct of research at IU, the external data must be handled according to the same quidance used for institutional data to ensure the integrity of the data and research, but IU does not assert ownership.

**Procedures** 

If you are utilizing data in an official capacity as a faculty member or graduate student at IU, and using IU resources, facilities, and/or equipment, then IU has a stake in those terms.

It is best for the Office for Research Administration to review all agreements (even ones related to publicly accessible data) to ensure the correct person signs it.

To submit an agreement to be reviewed by ORA, fill out the <u>ORA Contract Request Form</u>.

Where to find information regarding research data policies:

- The Rules & Policies of Data
   Management (University Data
   Management Council)
- IU RDC FAQ Policies & Procedures
- University Information Policy Office & University Information Security Office
- Data Policy Groups
- University Wide IT Policies

Policies & Procedures

### Planning research

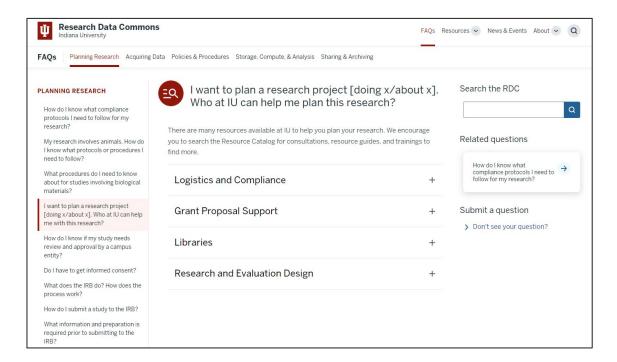

#### Finding resources for planning research:

- <u>IU RDC FAQs: Planning Research</u>
- Search for resources in the <u>Resource Catalog</u>, e.g. search "consult" to see groups that provide consultations.
- Look at the <u>Data Catalog</u> (still in development) and <u>look</u> <u>through repositories</u> to find datasets already available to you through IU.

### Planning Research

#### Planning Research

### Planning Research

"I want to plan a research project...Who at IU can help me plan this research?" (FAQs)

#### Sample resources for **compliance**:

Research Guidelines and Procedures (IU Research)

#### Sample resources for grant proposals:

- General support: <u>Proposal Development Services</u> (for faculty) & <u>GradGrants Center</u> (for graduate students)
- More specific support via several service centers and research cores, e.g. power analyses and evaluation plans (listed in FAQs, or search the resource catalog)

### Planning Research

#### Planning Research

#### Sample resources for **data management**:

- Research data management guidance
- <u>DMPTool</u> (via IU Libraries)

### Planning Research

### Acquiring Data

#### Acquiring or Purchasing Data

Planning

Explore your options at IU

Sharing & Acquiring
Data

Compute &

- How do I get data? (FAQ)
- <u>Data catalog</u>: Finding data already available to you for reuse (in development)
- Internal funding through the <u>IU Research Equipment</u>
   <u>Fund</u> (to support purchase of shared data resources)

## Acquiring Data

### Storage & Compute

#### Storage, Compute, & Analysis

#### Finding resources for storage, compute, & analysis

- IU RDC FAQs: Storage, Compute, & Analysis
- Search for resources in the <u>Resource Catalog</u>, e.g. search "storage" for different options and sources of guidance
- Look at our <u>events calendar</u> for upcoming trainings related to high-performance computing and data analysis techniques.

Storage, Compute & Analysis

#### Storage, Compute, & Analysis

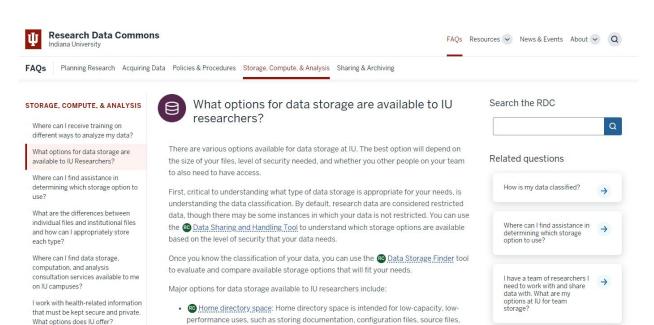

I have a team of researchers I need to

work with and share data with. What

are my options at IU for team

storage?

Storage, Compute & Analysis

"What options for data storage are available to IU researchers?" (FAQ)

and data files needed to run batch and/or interactive jobs on IU's Re Research

Slate: Slate is a centralized, high performance Lustre file system designed for the

persistent storage of scholarly data to meet the needs of data-intensive workflows

Submit a question

> Don't see your question?

#### Storage, Compute, & Analysis

#### Data storage options at IU

- Data Sharing and Handling Tool (guidance on where to store different types of data based on their domain and sensitivity classification)
- <u>Data Storage Finder</u> (tool to filter and compare different storage options)
- <u>SecureMyResearch</u> (resources and consultations to help you store and protect your data)

Storage, Compute & Analysis

#### SecureMyResearch

#### **Grants, Contract, DUAs**

- Interpret cybersecurity terms & conditions into your specific research context
- Work with ORA to negotiate reasonable terms
- Identify IU solutions that meet terms and conditions
- Provide security boilerplates to include in proposals

SecureMyResearch provides you with consulting and resources to help you protect research data and comply with cybersecurity requirements in grants, contracts, and data use agreements.

securemyresearch@iu.edu

#### **Regulatory Compliance**

- Help make sense of complex regulations
- Recommend complaint solutions
- Build complaint workflows

#### **Research Projects**

- Recommend/build secure/compliant solutions
- Design secure workflows
- Help with compliance/security documentation
- Security Review

#### SecureMyResearch Cookbook

#### SecureMyResearch Cookbook

Enter keywords related to what you want to do or learn, then wait a second for a drop-down with matches.

**Q** Search for a recipe

Welcome! The SecureMyResearch Cookbook offers information and recipes (step-by-step directions) to help you get your work done while ensuring that your research is trustworthy. The recipes do this by leveraging ingredients that have security already baked in by IU technology and cybersecurity/compliance experts. Many of the recipes are also pre-approved for certain types of critical data, for instance HIPAA protected health information (PHI). Simply follow the recipes, and you will find security and compliance seamlessly woven into your research workflows.

- Search for a recipe or information: Enter keywords in the search bar above titled "Search for a recipe" about what you want to do, for example, "share". Wait a second for a drop-down showing matches which you can click on.
- Seek consulting: If the cookbook doesn't provide what you are looking for, please email securemyresearch@iu.edu for help.
   We will take it from there.

Recipes by research area: Recipes by topic: Recipes by regulation:

Applied sciences

Data storage

HIPAA

### Training opportunities

#### **Training Opportunities**

#### **Upcoming Events:**

- October 18th: (IUI) Unlocking Grant Success:
   Insights from Grant Winners Focus on NSF
   Grant Applications
- October 24th: <u>Preparing to Share Research Data</u>
- October 25th: (IUI) IU Research Onboarding & Orientation
- November 8th: (IUB) IU Research Onboarding & Orientation
- November 8th: Workshop in Methods | Introduction to R
- November 11: <u>Federal Grants for Centers</u> Information Session

### Ongoing Training Opportunities & Where to Find Them:

- IU RDC Events page
- <u>UITS IT Training</u> (UITS)
- Search "Training" in the <u>Resource</u> <u>Catalog</u>
- Accelerator Crash Courses (CEW&T)
- Research Workflow Canvas Course
- Scholars Commons Programming (IUB Libraries)
- Workshop in Methods (Social Science Research Commons)

# Questions?

Thank you for coming! Slides will be emailed shortly after we end.
